

**Surgical Instrument Cleaning Detergent Enzyme Lubricants cut costs.**  
**Four Enzyme Surgical Instrument Cleaning Detergent Lubricants clean faster.**  
**Surgical Instrument Cleaning Detergent Enzyme Lubricants clean residue free.**

The all-in-ONE will replace multiple products, speed turnaround times, lower costs, and improve the performance of surgical instruments. The all-in-ONE Detergents deliver an average concentration that is 400% higher than other enzyme detergents. One gallon of the Surgical Instrument Detergent Enzymes can deliver 512 gallons (1938 liters) of cleaning power. The dilution rate is .25 to .5 ounces per gallon (1.9 ml liters to 3.8 ml per liter) depending on the level of bioburden, encrustation, and stains. The easy FOAM-it pre wash soak Surgical Instrument Detergent Enzyme Lubricant Cleaners lay down a thick blanket of long lasting FOAM to hydrate and remove all forms of proteinaceous debris, hard water deposits, and encrusted stains, for faster cleaning action. When water is added the FOAM dissipates.

all-in-ONE Enzyme Detergent Lubricant Cleaners

easy FOAM-it pre wash soak Enzyme Detergent Lubricant Cleaners

The highly concentrated all-in-ONE cleaners are aggressive against your most difficult cleaning challenge and guaranteed to be safe for all types of metal, rigid and flexible scopes, lenses, microsurgical instrumentation and reprocessing equipment.

- significantly reduce the cost of enzyme, detergent, stain removing, and lubricating consumables,
- improve turnaround times for soaking, hand washing, and automated cleaning,
- decrease the inventory level, the number of products used, and the space expended for storing products,
- improve the overall condition, appearance and performance of surgical instruments and scopes,
- combine the detergent and enzyme treatments for automated washers, manual cleaning, and presoaking.

The TOSI Test provides an indication of cleaning performance. Refer to the image, to the right. The amount of red material remaining on the stainless steel simulates cleaning performance. The Test Strip on the left shows cleaning results using the RUHOF Endozime AW Triple Plus. The Test Strip on the Right shows cleaning results using the all-in-ONE four Enzyme Detergent. Your best proof of the all-in-ONE performance will be your greatest cleaning challenge. The all-in-ONE breaks down all forms of proteinaceous bioburden, cleans the surface. The Enzyme Detergents (Lipase, Amylase, Carbohydrase, and Protease) break down all forms of bioburden and then rinses clean. Enzyme Detergent Cleaners that do not deliver these 4 enzymes cannot remove all forms of proteinaceous bioburden.
